Screen time experiment

A practical kit for usage observations, alternative activities, review questions.

This is a mock PDF describing a proposed product. It does not contain the promised guide, activities or templates. The product is not on sale.

What it is

Screen time experiment is a focused, self-guided planning kit for adults building practical routines. It organizes usage observations, alternative activities, review questions into a practical workflow, with editable worksheets and a completed fictional example. Start with your own situation, make the decisions on the worksheets, and finish with a plan you can revisit. The completed example illustrates the method; it is not a customer result.

Who it is for

Adults building practical routines

What you will make
